DETAILED ACTION

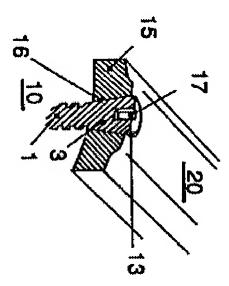

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gogolewski et al (U.S. Pat. No. 5,275,601). Fig. 4a of Gogolewski et al shows an orthopedic device having all the limitations as recited in claim 1, including: a polymeric bone plate 20 and a fastener 1 having a head 3, a surface (hex hole 17) configured to engage a drive tool, and a tissue engaging portion 1.

As to the limitation ""wherein a portion of the bone plate overlays a portion of said surface," note that, with the plate oriented as shown

above, with the plate surface 20 oriented vertically, the portion of the plate that is above

the screw head 3 and surface 17 (e.g. at 15) can be said to "overlay" surface 17.
